Aladdin Supplies and Extra Parts

The many improvements made in the Aladdin from time to time, have necessitated new designs of certain parts that could not always be made interchangeable in all the different models. Therefore, to make it convenient for our customers to order supplies and extra parts, we show herein the parts that fit the different models of the Aladdin. In ordering, it is well to always specify the model of your Aladdin, as well as the finish. The model number will be found on the buttons of wick ratchet of No. 5, No. 6, No. 7, No. 8 and No. 9. Previous models can be determined by comparing the illustrations shown in this circular with the parts on your Aladdin.

CAUTION
If the generator is destroyed—i.e., if any of the little bridges of metal inside the lamp are broken or damaged—do not use any little part that has been damaged. The lamp is made of a strong mixture of lime and glass, and the generator is used to carry the flame. It is very dangerous to use any part of the lamp that has been damaged, as the lamp may burst and cause serious injury.

We will gladly include with your order a selection kit for your Aladdin if you will request it on your order and indicate model of your lamp.
