

# Illustrations, Descriptions, Information and RETAIL PRICES of Genuine Supplies and Extra Parts for

## Aladdin <sup>KEROSENE</sup> (Coal-Oil) Mantle Lamps

The many improvements made in the Aladdin from time to time, have necessitated new designs of certain parts that could not always be made interchangeable in all the different models. Therefore, to make it convenient for you to order supplies and extra parts for your customers, we show herein parts that fit the different models of the Aladdin.

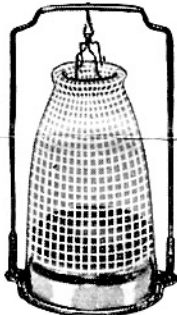

In ordering, always specify the model of the Aladdin, as well as the finish. The model number appears on the button of wick ratchet of Nos. 5, 6, 7, 8, 9, 10, 11, 12 and Model A and B. For extra parts for Aladdin lamps of models previous to Model 5, send old part in for duplication, if you cannot determine what to order from information given.

### Aladdin Mantles

Lox-on Type

For use on all Instant-Light Aladdin lamp burners of Nu-Type Models B or A or Model 12. Packed in Orange and Blue Carton.

KoneKap Type

For use on the following Models of the Aladdin Lamp, viz: Model Nos. 3, 4, 5, 6, 7, 8, 9, and 11. Packed in Orange and Black Carton.

PRICE, Each, Either Type, 35c

### IMPORTANT

When ordering Mantles, be sure and state whether you want Lox-on or KoneKap Mantles. It will be easy for you to determine what kind of Mantle you require if you will refer to the illustration above. If you are then in doubt, note gallery used in your Aladdin—under illustration of same shown below you will find the style of Mantle you should order.

### Aladdin Galleries

Type of Gallery used with KoneKap Mantles

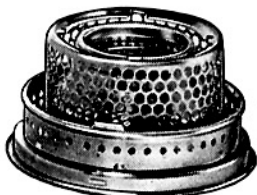

KoneKap Gallery

A replacement part for gallery on Model Nos. 3, 4, 5, and 6 Burners. Available in Nickel or Satin Brass finish. Galleries for Model Nos. 7, 8, 9, and 11 Burners are no longer available as a replacement—but complete New Model 12 Burner may be used on these models (see next page).

Price Each 70c

Give Model number of lamp and finish wanted

Type of gallery used with Lox-on Mantles

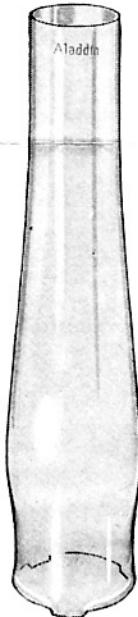

No. 12 Gallery

A replacement part for Gallery used on Nu-Type B & A, and Model 12 Burners. Available in Brass finish only.

Price Each 70c

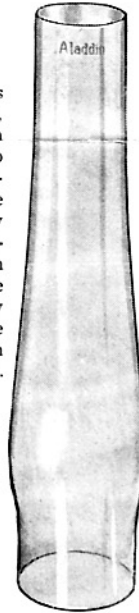

Give Model Number of lamp and finish wanted

### Aladdin Chimneys

Lox-on Type

As a replacement part on Aladdin lamps of Nu-Type Models B & A or Model 12. Has special lugs at bottom for locking to gallery. Packed in Orange and Blue Carton.

Old Style Type

Aladdin chimneys are all 12½" tall, and nearly 2" in diameter at top inside. These chimneys are high-grade and scientifically proportioned especially for Aladdin lamps. To insure best results use only chimneys trade marked Aladdin on the chimney itself.

As a replacement part on Models No. 1 to 11 inclusive. Packed in Grey and Blue Carton. Cannot be used on Nu-Type Models B & A or Model 12 (see left).

PRICE, Each, Either Type, 35c

### Bowls and Founts Aladdin Chimney

Bowl No. 053 in Clear Crystal as replacement part on all previous styles of Table Lamps using Model A or B Burners.

Price, each \$1.00

Bowl No. 075 in Ivory Alacite as replacement part on all previous styles of Table Lamps using Model A or B Burners.

Price, each \$1.25

Fount No. 0153 in Ivory Alacite as replacement part on all previous styles of Hanging or Bracket Lamps using A or B Burners.

Price, each 75c

NOTE—None of the above items usable with Model No. 12 or earlier model burners.

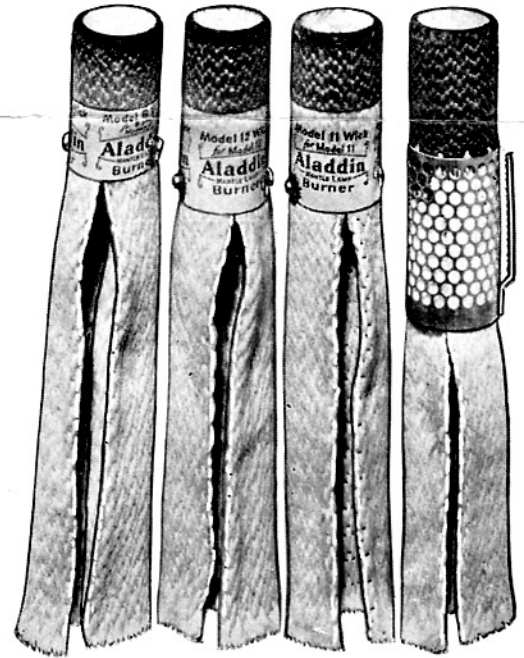

### Aladdin Chimney EXTENSION

of metal and designed for use on Aladdin chimneys in altitudes of 4500 feet or over, and to increase flow of rarified air thus supplying sufficient oxygen to properly support flame. Adds 4" to chimney length.

Price, Each, 25c

### Aladdin Wicks

Reinforced - Mounted - Charred

Nu-Type Model 12 Model 11 Model 6

Aladdin Nu-Type Wick for use on Nu-Type Models B or A only

(Packed in Green and White Carton)

Aladdin Model 12 Wick for use on Model 12 only (Packed in Blue and Orange Carton)

Aladdin Model 11 Wick for use on Models 7 to 11 incl. only

(Packed in Black and White Carton)

Price of Nu-Type, Model 12, or Model 11 wick, Each.....30c

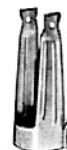

Aladdin Model 6 Wick for use on Models 3 to 6 incl. only

(Packed in Red and White Carton)

Price, Each 35c

Instructions for removal of old, and insertion of new wick supplied in or on its Carton. Always give Model number of Aladdin for which wick is wanted. Such number will be found on cap of wick raiser button.

### Aladdin Wick Raisers

Metal-sleeve wick mountings and plain, uncharred wicks used in burners of Model 1 and 2 are no longer available.

Wick Raisers for Models 3, 4, 5 and 6 are an integral part of the Model 6 wick (see wicks above), are not sold separately, but are included in the price of such wick.

Wick Raisers for all Models 7 to 12 inclusive and Models B or A are available separately, but are slightly different in most cases in each model. In ordering wick raisers, give Model number (see face of wick raiser button) to insure receipt of proper raiser for such lamp.

Price, Each, (any Model) 25c

**Outer Wick Tube Only for Model 12**  
Instant Light Burner

(In Brass finish only)

Price, Each.....60c

## Aladdin Flame Spreaders

Aladdin Flame Spreaders (sometimes erroneously called generators) are not interchangeable but must be used on the Model Aladdin for which each were designed. Exceptions however prevail. In the case of Model 6 Flame Spreader it is also adaptable to Model 5, Model 11 is also adaptable to Models 7 to 11 inclusive, and Model 12 is also adaptable to Models B and A. See information below.

No. 12 and Nu-Type B & A

No. 11

No. 6

No. 12 Flame Spreader interchangeable for use on all Instant Light Burners Model 12 or Model B or A. (Identified by cone depression in top with small round hole at bottom).

No. 11 Flame Spreader interchangeable for use on Models No. 11, 10, 9, 8; and 7 which use KoneKap Mantles (Identified by No. 11 stamped in top surface of flame spreader).

No. 6 Flame Spreader interchangeable for use on Models No. 6 and No. 5 Aladdin lamps, which use KoneKap Mantles. (Identified by No. 6 stamped in top surface of flame spreader).

Price, Each, (any Model) 15c

NOTE:—Flame Spreaders for Models 1 to 2 are not available.

## Aladdin Shade Tripods

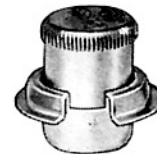

Knocked Down or Collapsible Type with Center ring which fits down over and rests on lower flange of gallery of burner on Aladdins of Model 7 to 11, 12, A or B. Cannot be used on earlier Models 1 to 6 as diameter of gallery is too small. Give finish and size desired. Tripods for Models 1 to 6 not available

For 14" Dia. Shade—Brass, Bronze, Rose Gold, Ea. 25c  
For use with 14" Whip-o-lite shades for Table or Bracket Lamps

For 16" Dia. Shade—Nickel, Bronze, Rose Gold, Ea. 25c  
For use with 16" Whip-o-lite Shades for Floor Lamps

For 10" Dia. Shade—Nickel, Bronze, Rose Gold, Ea. 20c  
For use with 10" Glass Shades for Table or Bracket Lamps

WICK  
**Aladdin CLEANER**

Designed for easily and quickly cleaning and shaping wick and cleaning wick tube surface. Can be used on all models.

Price, Each, 15c

INSECT  
**Aladdin SCREEN**

Of Brass, and designed to fit snugly over top of chimney. Prevents bugs or large flies from falling down chimney and injuring Mantle.

Price, Each, 30c

## Aladdin Wall Brackets

Bracket (swing arm type) with 6" diameter non-expanding lamp supporting ring, which will receive any Aladdin Fount lamp of 6" diameter under chime. Can be used for all Model founts except Models 7 and 8 which are 7" diameter. Bracket No. 0179 Nickel finish or No. 0180 in Bronze.

Price, Each, 60c

## Aladdin Extension Fixture

A new patented fixture with case entirely of pressed steel—cannot break. Fits snugly against ceiling, giving it a neat and trim appearance. Gives lamp a height variation of 3' 6" and is easily locked or unlocked at any desired point in this range.

Quick and positive and easy in action. Can be used on all Aladdin or other styles of hanging lamps. No. 03N in Black Nickel finish, No. 03G in Rose-Gold finish and No. 03B in Bronze finish. Order by No.

Price, \$2.75 Each

Models 1, 2, 3, 4, 5 and 6 Complete Burners or Burner Bases are not available.

## SPECIAL NOTICE

It is our desire to have every user secure the maximum of service from their Aladdin lamps, and we earnestly solicit the dealer's co-operation to this end. Occasionally Aladdin users, when buying supplies from the dealer will ask the dealer for some information pertaining to the care and operation of the Aladdin, and in case you cannot instruct them properly, we would ask that you kindly send us the customer's name and address and nature of the inquiry so that we may write them. Or, if you prefer, suggest to your customers that they

themselves write us, when we will be very pleased to see that they receive all information necessary. Your co-operation in this respect will be of profit to you, for the better pleased Aladdin users are with their lamps, the more and longer they will use them and the greater will be the amount of your supply business. Satisfied Aladdin users build business for both you and ourselves so it is to our mutual advantage to keep them satisfied.

## Helpful Hints

While the Aladdin is a very simple device and the instructions for operating are easily followed, it sometimes happens that a user will experience some difficulty in securing satisfactory results. This failure is usually due to some neglect on the part of the user and when this occurs the user will doubtless come to the dealer in his difficulty. Below is given a list of the reasons why Aladdins fail to operate correctly and the remedy and by consulting this list the dealer should be able to cure practically all the troubles the user may have. In the few cases when dealer cannot put the customer right we suggest the dealer write us fully when we will gladly straighten out the trouble.

- 1** Setting the wick too high before burner parts are thoroughly heated, not allowing for the flame to increase a little—  
**Result:** Smoke up the mantle.
- 2** Allowing the wick to become dirty or crusted with carbon—  
**Result:** An uneven blue flame which will usually smoke up the mantle.
- 3** Allowing wick to become uneven in height, raw or ragged—  
**Result:** An uneven blue flame, generally smoking up the mantle in spots.
- 4** Allowing lamp to overheat, smoke up and burn dry—  
**Result:** Burn the end of the wick and spoil it so it has to be re-charred or a new wick inserted.
- 5** Using the lamp with a dirty, crusty wick tube flange with residue on the edge, or jammed wick tube flange—  
**Result:** Interferes with air introduction over wick tube flange and makes an uneven flame that will smoke the mantle in spots.
- 6** Denting the flame spreader, or allowing residue or dirt in the little holes—  
**Result:** Interferes with air introduction through the flame spreader and produces an uneven flame that will smoke mantle in spots.
- 7** Not locking Mantle on all catches on sides of the gallery—  
**Result:** Air not introduced into the flame properly, and consequently cannot get a good flame or much light from the mantle.
- 8** Not locking the chimney tightly on its catches in the gallery—  
**Result:** Air does not get into the flame and cannot get good flame or light from the mantle.
- 9** Not locking gallery properly on burner—  
**Result:** Gallery apt to fall off and break the mantle and chimney, also may interfere with flame so as not to get full light.
- 10** Putting new mantle on so it does not hang central—  
**Result:** Mantle will light up on one side and not on the other.
- 11** Touching mantle before the coating is burned off, or sticking a match stick into it when lighting the coating—  
**Result:** Mantle will likely fall to pieces at the point where it was touched.
- 12** Not placing flame spreader all the way down on the seat in inner wick tube—  
**Result:** Mantle will light up at bottom only.
- 13** Burning lamp for some time in a closed room where there are a number of people and no ventilation—  
**Result:** Flame will flutter and die down, and possibly go out.
- 14** Not properly locking outside wick tube to burner base  
**Result:** Wick tubes will not be level, inside tube and generator will be too low. The flame goes up to top of mantle and will not incandesce it properly.
- 15** Not screwing burner all the way down on bowl— (applies on Model 12 only).  
**Result:** Tripod (shade holder) will not be securely held down on neck of lamp.
- 16** Allowing paper or other material to be stuffed down in the center tube—  
**Result:** Cannot get a blue flame, only a smoky, yellow flame results.
- 17** Trying to use gasoline, benzine or other explosive fuels—  
**Result:** Very dangerous—explosion is apt to occur.
- 18** Letting gallery drop into position on the burner—  
**Result:** Very apt to injure or break the mantle.
