

NOTICE TO USERS OF ALADDIN KEROSENE MANTLE LAMPS MODELS A & B

Our engineers spent a great deal of both time and money to develop the new and greatly improved Aladdin Burner, Model "C". It carries out our promise to you to give you the best we have in everything at all times.

It has several very important advantages over older types. The greatest of these is its ability to remain cooler in operation - thus making it far more reliable than older types; ie: the flame will not "creep up" to the extent it did in all previous models. We have discontinued the manufacture of all Model "B" Burners and Model "B" Burner parts.

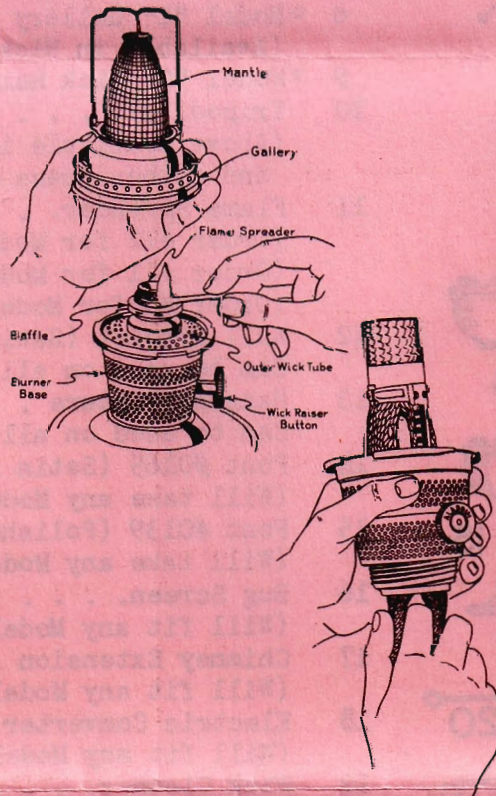

To convert your present Model "B" to the equivalent of a Model "C" and get the advantages of more reliable operation, order only a "C" Baffle and "C" Gallery and equip your Model "B" Burner with them.

However, if ever you need only a new Outer Wick Tube for your Model "B", order only a Model "C" Outer Wick Tube without the Baffle.

If ever you need only the Burner Base for a Model "B", order a Model "C" Burner Base and a "C" Wick Raiser. The "B" Wick Raiser will not fit the new improved "C" Burner Base.

If ever you need only a new Gallery for your Model "B", order a Model "C" Gallery with a "C" Baffle. The "B" Gallery is no longer available.

Should ever you need a new Wick Raiser for your Model "B" you will have to order a Model "C" Burner Base and a "C" Wick Raiser. The old style "B" Wick Raiser is no longer available and the new improved "C" Wick Raiser cannot be used in a "B" Burner Base.

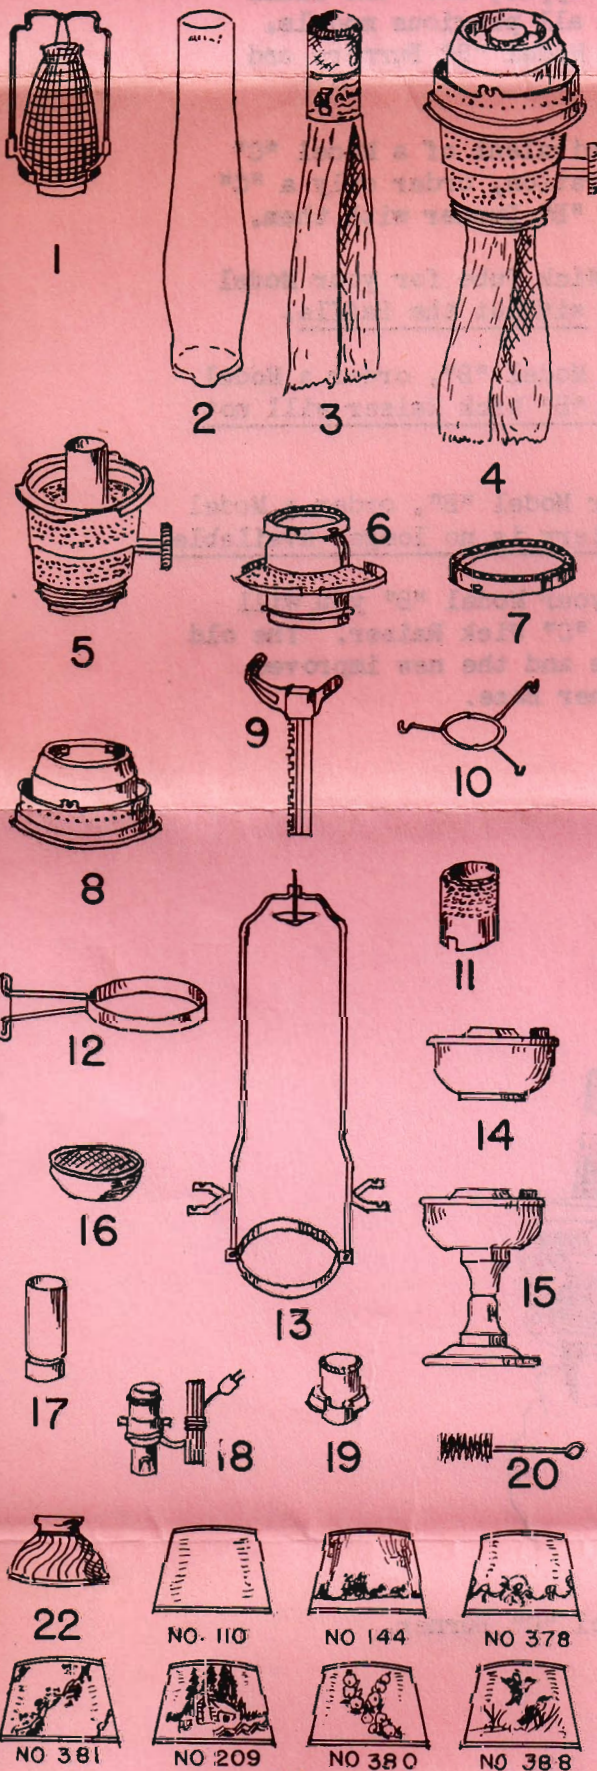

NOTE: These drawings illustrate the new Model "C" Burner.

Always specify the Model number of the Aladdin you have, when ordering parts. THE MODEL NUMBER OF A GENUINE ALADDIN KEROSENE MANTLE LAMP APPEARS ON THE BUTTON YOU TURN TO RAISE THE WICK. If the name "Aladdin" and a model number isn't on the wick button of your mantle lamp, then you haven't a genuine Aladdin Lamp.
