Introducing the Wonderful New

Aladdin

Reinforced Wick

The Greatest Improvement on the Aladdin in Years—

One of the greatest difficulties, that of securing and keeping a perfect wick surface on an Aladdin lamp, is at last a thing of the past. This new Aladdin reinforced wick turns the trick. No matter how satisfactory your Aladdin has been, this new wick will greatly improve its service to you. No more uneven wicks—a smooth beveled wick surface of equal height all around at all times gives you an Aladdin vastly more reliable than ever and reduces the likelihood of smoking to the very minimum.

Fits all Aladdins Since the Model 2

Our Engineering Department has developed this new wick after months of research and experimental work and pronounce it close to perfection. Fortunately this new wick can be and is made so that it can be used in all models of the Aladdins since our Model 2. It thus becomes possible for all Aladdin users to have and enjoy the benefits of the wonderful Aladdin Reinforced wick.

We are now prepared to fill orders for these new wicks for Models 3, 4, 5, 6, 7, 8, 9, 10 and 11. Be sure to state the model number of your Aladdin when ordering, as wick mounting varies.
